

NEWS OF HORSES AND HORSEMEN

At Alamance Farm, North Carolina, Where Gregorian Is.

GILES MEBANE IS THERE, TOO

Boney Boy Broken Down - Mr. Payne Buys Edmonia and Corrado and Sarna-Gun Metal Wins at Chicago.

At Alamance Farm, Graham, N. C., the former home of the crack pacer, John R. Gentry, Mr. L. Banks Holt, who owned that famous son of Ashland Wilkes, has some of his get which promise well, among them being the grand looking brown colt Giles Mebane, three-year-old, whose dam is the Hannis mare Winnie D, that produced Hulman, second, and the first Glinter, 2:24 1/4. Giles Mebane is a pacer and William Chalmers, the farm trainer, regards him very highly. In addition to Giles Mebane, Chalmers has in the training barn, Chalmers, ch. f., 3, by John R. Gentry, dam Blondette, dam of Governor Holt, 2:15, by Leland; b. f., 3, by John R. Gentry, dam Onondia, by Dictator; b. f., 3, by Gregorian, dam Gretta Green, by Aberdeen; ch. f., 2, by Gregorian, dam Winnie D, b. f., 3, by Gregorian, dam Blondette, and b. g., 1, by Gregorian, dam Winnie D.

Gregorian, 2:29 1/4, the good looking chestnut son of Prince George and Helina, by Mansfield, being the stud at Alamance as a sire Mr. Holt owned at the farm, as his get are not only speedy, but well formed, handsome and even tempered. The broodmare band at the farm includes Winnie D, b. f., 3, by Fiveway, who dropped a chestnut colt in the spring by Gregorian and was bred back, as was Gregorian Green, the full sister to Mattie, b. f., 2:24 1/4, by Aberdeen, out of Happy Choice, by Happy Medium, who has a bay colt at her side by Gregorian and was bred back; Blondette, dam of Governor Holt, 2:15, that speedily son of the famous Pacer, 2:10, by Leland, dam Minnie, by Kentucky Prince, lost her foal last winter and was bred back to Gregorian. Onondia, ch. f., 3, by Mace's Hambleton, and Fantine, dam of Jean Valjean, 2:14, by Alcedo; Sue H, by Woodburn Hambleton, dam Alice, by Ashland Patchen, and Cora, the full sister to the daughter of Dictator, used by Mr. Holt as a roadster, neither of whom have been bred for several seasons, were mated in the spring with Gregorian. In Governor Holt, the first winner at the great Chicago Exposition, Dupont, who carries a coat of white and bay, and the tiny midket Montrose, a solid bay in color and three feet in height, Alamance has a full complement of pony stallions that are impressive sires, while the band of brood mares with which they have been mated is probably the choicest in all North Carolina. These gentle creatures round the pastures at will and being of various colors, though most spotted or piebald, and to look them over in their freedom forms one of the charms to those who visit the place. The sons of a great manufacturing establishment rest upon the shoulders of Mr. Holt, but pleasure and recreation are found in directing affairs at Alamance, which is one of the most highly improved farms in the South, and ranking among the best known of Southern breeding establishments.

The recent death of Miss Woodford, at Rancho del Paso, Kansas, to which she had come to reside, was a great loss to the horse world, as she was one of the best race mares that ever lived, and also shows the uncertainty of breeding. No State, not even far-famed Kentucky, could boast of three such celebrated queens of the turf as Miss Woodford, a broodmare, the late Mrs. Woodford, and her daughter, Mrs. Woodford. In the early eighties Miss Woodford scored many victories, yet, mated to stallions of reputation, she has not only failed to reproduce herself, but has given this turf not one race horse of make or even headship. Woodford, a broodmare, was a grand race mare of the finest blood lines, yet she will never be remembered for anything she has yet given to the turf. Of course, Woodford was a much younger mare than Miss Woodford and has yet a chance to reproduce herself as a broodmare. Los Angeles, while not quite as high class a mare as Woodford was much more to the eye than the Haggin crack. None of her progeny has displayed any promise. On the other hand, at the same ranch where Los Angeles is owned, Alpha, a champion steeple chaser, produced Ray E. Santa Anita, the winner of the American Derby. Marlan, pre-eminent the grandest broodmare ever bred to California, had no reputation as a race mare, but she produced the Emperor of Norfolk, 3:10, Ray E. Santa Anita, and several other crack race horses. In spite of these facts the owners of stock farms are still mating stake winners with stake winners, with the expectation of producing record breakers. Before closing the subject of the uncertainty of breeding race horses it would be apropos to recall that while Woodford has been a failure as a broodmare, her full sister, Fleurette, who never shone as a race mare, has been a success. Perhaps after all the non-success attending Miss Woodford, Los Angeles and Fleurette has been due to their seasons of hard racing - San Francisco Chronicle.

Robert Bradley's grand three-year-old, Boney Boy, broke down recently after a race at Hawthorne Park, Chicago, and will not be started again for some time. The unsexed son of Blitzen, "The Iron Horse," and Sue B, who was bred by Mr. Bradley at Greenwood Farm, on the James river, has proved himself one of the stoutest hearted and gamiest campaigners ever bred in Virginia, and the ordeal through which he passed in 1898, as a two-year-old, was sufficient to have completely knocked out any ordinary youngster, although he withstood it, but the campaign of the present season has done the work, and no wonder, as the gelding has been started on an average of probably more than three times a week since early in the year. Blitzen, the sire of Boney Boy, was bred during six successive seasons, often times winter and summer alike, by Mr. Bradley, but, like his gelded son, the brown stallion finally succumbed to the ordeal, and was retired to the stud a cripple, which, however, seems in nowise to affect his potency as a sire.

A New York turf writer has the following of Mr. Dwyer and the running up of Trumpet last Saturday:

"The most bitter enemies of M. P. Dwyer - and in the old days when he had power - his enemies were not few - felt a twinge of sympathy when his two-year-old, Trumpet, inner of a selling stake yesterday, was bid up by M. T. Griffin from \$1,000 to \$1,500. Supported on the arm of a friend, Mr. Dwyer, now a thin, gray, feeble old man, quietly protected his horse. After the bidding was over a bystander said: 'It was sorry to see your horse bid up. I was sure that's all right,' replied the old player, without raising his head, 'if you run in selling races you must expect to be bid up. I have no complaint to make.' Then he

Branch Under The Jefferson.

walked unsteadily back to the grand stand. "He was a hard, cold man," said one who disliked him thoroughly and for reason to "but I must say that the gamest thoroughbred he ever owned did not have his courage. He has lost a million and a half, and has never complained of a horse, of a jockey, of a foul or of a judge's decision. Whenever I lose a big bet and feel like playing the baby, I look up there at old Mike, alone in his old age, with his fortune gone, his great horses gone, all his power gone, with a face like flint and never a whimper."

Secretary W. E. Dillon, of the Virginia State Fair and Agricultural Association, Norfolk, Va., anticipates a great fair and race meeting to be held there this fall, the dates of which are October 3rd, 4th, 5th, and 6th. The sum of \$50,000 in purses of the uniform value of \$500 each will be distributed among trotters and pacers, and the contests between these will furnish sport of high order. Liberal premiums will also be offered for live stock and farm products, the display of which promises to be a most interesting one.

A. D. Payne, of the Anita stud, Charlottesville, Va., has recently purchased the following thoroughbred brood mares from Hon. Thomas S. Martin, Secretary of the State, by E. J. Kader, and Carondeau, a bay, by Gunnar, out of Anita S, by Uncle Vic, both with foals at their sides by Imp. Water Level and bred to Castaway, H. from W. J. Ficklin, Charlottesville, Va. a bay, by Imp. Muscovy, out of Sarnienta, by Longway, with a bay filly, foal of 1898, at her side by Imp. Water Level. Sarna was bred this season. Among the good things in the stable of H. D. "Curley" Brown, who has been racing at Brighton Beach, are Merry Day, by E. J. Kader, out of Mermaid, by Imp. St. Blaise, and Waterhouse, the aptly named son of Imp. Water Level and Miss Hester, by Imp. Kyrie Daly, who was bred by W. J. Ficklin, Charlottesville, Va. Merry Day, who was the sensation of the meeting at New Orleans last winter, was bred in the Ellerslie stud, Charlottesville, by Captain R. J. Hancock.

At Erie, Pa., on July 26th, the handsome bay mare Jane S, by Edgewood, out of Belle of Richmond, by Daniel Lambert, won a couple of heats and got second money in the 2:28 class, trotting, the race going to Moquetteum. The daughter of Edgewood finished first in the third and fourth heats, the time of the latter being 2:22 1/4, a new mark for her. Jane S was bred by H. D. "Curley" Brown, who has been racing at Brighton Beach, and near this city, who owned her sire and dam.

Col. Thomas W. Holloway, secretary of the South Carolina State Agricultural and Mechanical Society, has issued the premium list of the 21st annual fair of the society to be held at Columbia on November 6th to 10th, inclusive. The annual State fair ranks among the most notable events of the year in the Palmetto State, and many thousands gather in Columbia during that week. Col. Holloway is widely known and a veteran in the service of the society, and has filled the office of secretary for many years with credit.

Esplanade, the good filly by Inspector B, out of Summard, is still winning at the Chicago tracks. She was bred at famous Belle Meade Farm, Nashville, Tenn., S. J. the breeding establishment of M. Lorillard. The grand old gelding looks sleek and fat, while his legs are absolutely without a blemish of any kind.

The chestnut gelding, Gun Metal, 4, by Eon, out of Amy, by Hindoo, recently won at Hawthorne Park, Chicago, at one and a quarter miles in 1:18 1/2, defeating Elliland, Woodranger and four others. Gun Metal, bred in the Ellerslie Stud, Charlottesville, Va., by Chas. K. Harrison, Baltimore, who owns his dam, Amy, is in the handicap for three-year-olds and upward, to be run at Brighton Beach on July 20th, which was won by Cambrian, Charentis, by Imp. Charaxus, out of Contenda, by John Happy, ran second and Gray Jacques, by Jim Gray, out of Jacqueline, by Imp. The Jacobite, second. Time 1:17.

BROAD ROCK.

The petroleum output in Southern California now amounts to about 5,000 barrels a day, and it is all consumed upon the Pacific Coast. It was discovered about ten years ago, and has been in use for about five years.

STATE POLITICS FOR THE PEOPLE

A Very Warm Contest in Amherst County.

TROUBLE IS EXPECTED.

The County Committee Condemns the Use of Money and Liquor and Refuses to Allow Names of U. S. Senatorial Candidates on Ticket

AMHERST, VA., August 5.-Special.-From where the "Sleeping Giant" lies prone on the summit of the Blue Ridge mountains to the uttermost borders of the county Amherst lies a political contentment engendered by a political contest is great, and many are the predictions that ere September 20--the end of the campaign--shall have passed, there will be personal encounters and even possibly bloodshed. And the issue is entirely a local one. Who shall be sent to the United States Senate--whether Martin or Tyler--has given the good people little or no little concern as yet. The whole contest centers around the county judgeship, and in order for it to be understood, a short digression is necessary.

At the last session of the Legislature the question of who should fill this position was a vexed one, but it was finally settled by the election of Mr. Bentley R. Campbell, a young lawyer, who was, it appears, acceptable to the people. He wore the ermine but a short time, however, for one day he appeared before Governor Tyler, resigned his seat and in the short possible time, Mr. Campbell, a member of the Legislature which selected Mr. Bentley Campbell, was appointed his successor and duly qualified--the latter even being a member of the county jury. The people of the county received that they had been awarded a new judge. The appointment occasioned considerable surprise, for although Mr. Campbell was recognized as a lawyer, he was not a member of the bar and had no legal education and of law and experience therein was and is limited.

Then, again, the people regarded with disfavor an appointment in which they had had no opportunity to make known their wishes. Therefore, it has come about that there is a strong determination to turn Judge Campbell out of office. He is the owner of the Amherst New Era, out of the seat, which he has filled such a short time.

On this point the people have divided, but what is the relative strength of either party can only be conjectured this early in the fight.

The anti-Campbell party has as its candidate Mr. Thomas Whitehead, Jr., of Elin District, which is adjacent to Lynchburg.

CAMPBELL CANDIDATE. The Campbell candidate is Dr. Robert R. Ware, of Temperance District, which lies among the mountains. Dr. Ware is a physician and farmer. He is not a politician nor a speaker, however, and for that reason Judge Campbell will represent him in the campaign. The action of the Democratic Executive Committee having provided for joint discussions, Mr. Whitehead and Judge Campbell will meet for the first time at Walker's Ford on August 12th, at the words battle will continue almost daily until the wind up at Pedlar Mills on August 21st.

It is feared that trouble will arise from these debates, more especially from that to be held at Amherst Courthouse, the home of Judge Campbell, on court day, the 21st of this month, at which time it is expected that representatives of the two parties will be present.

It may be timely to note just here that Mr. Whitehead is an ardent Martin man, whereas the position of Dr. Ware, the Campbell candidate, is not well defined. Judge Campbell was once a Martin adherent, but he is now a member of Governor Tyler's staff, and it seems likely, his candidate will support Tyler.

The determination to hold joint debates is not at all to the liking of the Ware following, and in the hope of doing away with it Judge Campbell addressed Mr. Whitehead a letter in which he proposed that none be held, giving as reasons that the Democratic party in Amherst was in bad shape; that he feared injury would be done it, and that there was also danger of personal difficulties. Mr. Whitehead replied briefly that he saw no danger of damaging the party by a friendly discussion, and approved no personal difficulties.

The discussion, therefore, will go on, as stated, Mr. Whitehead being assisted by Mr. W. K. Allen. Meantime the opponents of Judge Campbell have been causing a good deal of trouble for the judge, who has an accretion of candidates for the judgeship. They at first fixed on Mr. W. Brent Sandiego, but he has come out in a card declining the honor, for which determination the new Era heartily commends him.

It is now said that Mr. W. K. Allen has been selected and will be endorsed by a large number of people.

THE DEMOCRATIC EXECUTIVE COMMITTEE, which met July 17th at Amherst, adopted resolutions arranging for the campaign and the primary of September 2d, among which the following is of note:

"Resolved, That the Democratic Executive Committee repudiates and condemns the use of money or liquor in elections."

At this resolution the resolution was offered providing that the names of the candidates for United States Senator be printed upon the ballots cast at the primary September 2d. It was defeated by a vote of 9 to 6.

HORSE FELL WITH HIM.

Virginia a New Town That is Making Fast Strides.

CHRISTIE, VA., Aug. 5.-Special.-Mr. John Rodgers, who lives here, while returning home from Christie late yesterday evening, had one of his arms broken by being thrown to the ground by the horse, upon which he was riding, stumbling and falling.

Misses May and Annie Bacon, formerly of Chase City, but now of Texas, are on a visit to their sister, Mrs. P. R. Hardie, of Virginia.

Virginia is still growing, and improvements going on all the time. Work is now going on in a number of buildings. The Virginia Pharmacy, Dreyer & Garner proprietors, has opened. There has been a rumor of a bank being opened there also.

The mineral interests, which are excellent there, will in the course of time make it a prosperous inland town. Near Omega, I understand that the mineral prospects are very bright, and the mine at High Hill is thought to be very promising.

Since the rains the farming prospects have improved wonderfully. The growing crops under the favorable weather are green and flourishing.

Mr. J. A. Robertson, of Christie, since last Christmas, has had two dogs, two hogs and one cow killed by the locomotives of the Atlantic and Danville railroad.

port News. The hotel here has been crowded since Monday night. There will be a meeting of Democrats on Thursday, August 10th (regular County Court) for the purpose of electing delegates to the convention to be held in Williamsburg on August 12th. Mr. and Mrs. Frank Mulford, of Newport News and Miss Owen of South Boston, are the guests of Mr. Mulford, of Charles City county.

R. E. Richardson has closed down his mill on account of yellow fever, as traffic to Newport News has been suspended. Mr. Clarence Walinger will leave to-day for his home in Powhatan.

The family of Mr. E. E. Purdum, who has been sick all the summer, are slowly improving.

THE DANGER OF ALCOHOL.

Dr. Hewes Takes Issue with Prof. Atwater in Regard to the Effects. The recent experiments of Prof. Atwater are of great interest to physiologists and chemists since they throw much light upon one of the doubtful questions of physiological chemistry or pharmacology, that of the metabolism of alcohol in the body.

It is a mistake, however, to think as some people apparently do, that the result of these experiments should change the teaching in the schools in regard to the use of alcohol from a hygienic point of view. The schools teach that the use of alcoholic liquors as a beverage is not hygienic under the laws of hygiene. The results of Prof. Atwater's experiments do not contradict this teaching.

These experiments merely show that the body can derive some energy from alcohol. This does not in itself entitle alcohol to be placed among food substances in the hygienic sense of the term, which is the sense in which the schools and people in general use the term food. If it did, such a violent poison as muscarine, the active principle of the poisonous plants of the mushroom family would have to be classed with the foods, since it also is oxidized in the body with liberation of its contained energy.

To class a substance among the foods we must know that the sum total effects of its use are beneficial to the body. Muscarine is not a food because its poisonous effects offset the benefit of the energy which it liberates. Alcohol has poisonous effects as Prof. Atwater himself admits. The question as to whether it can be considered as food depends entirely upon whether its beneficial effects are greater than its poisonous effects. Prof. Atwater's experiments do not prove this. Until this is proven the burden of the proof is against those who would include alcohol in the list of food substances for use in the modern diet.

Petroleum cannot be exploded in a new way, but it is a dangerous substance, being intersected near its base by a flat strip of tin, having a narrow slit, which will prevent the passage of a spark, but which allows the oil to flow freely.

In an improved electric hair-brush the battery and induction coil are mounted on the back of the brush, and a number of electric plates are attached to the brush to form a circuit through the body, the current flowing through the metallic bristles into the head and thence to the plates.

A mechanical motor for use in drying small boats has been designed, consisting of a motor shaft set in bearings in the bottom of the boat, with a gear of oscillating rods pivoted to a standard, with a bevel gear arranged at the bottom to drive the shaft, pedals being provided for one or two persons.

A newly patented device for winching a two-ton weight of wire doubled and twisted spirally, with a button at the top, by which it is suspended, a slotted handle being forced down over the spiral to impart a turning motion to the rod, which fits at the lower end into a slot in the head of the top.

Two Californians have designed an adjustable lamp for electric lights, comprising a reel suspended in a bracket, to be attached to the ceiling, with a cord leading from the reel which winds up the wire by which the lamp is suspended.

A Massachusetts man has patented an anti-fouling coating for ships, consisting of a layer of paint of a brown color, of soft metal, a second layer of paint and an outer coat of conglomeration of copper, presenting a smooth surface, closely studded with large particles of copper.

Penholders can be held in position for writing without gripping them with the fingers, by means of a device, consisting of a piece of thin metal bent to fit the portion of the hand between the ball of the thumb and the base of the first finger.

"Train orders can be delivered to the customer, while the train is under high speed by the use of a new order-delivering device, which has a wire loop with a clasp on one end and a grip on the other, a certain arrangement in the top of the box to intermittently hold back a portion of the cards as they revolve.

Street car conductors will appreciate a new fare register designed for their use, and the cost to the company is lessened by its use, the new apparatus being held in the hand, with a sliding yoke to be gripped by the thumb and depressed, registering the fare on a dial and ringing a bell.

Facts About Hair. Black hair was most esteemed by the ancient Hebrews, while the Greeks and Romans gave preference to the golden tints, a certain arrangement in the top of the box to intermittently hold back a portion of the cards as they revolve.

People with very fair, almost colorless hair, accompanied by white lashes and eyebrows, are generally of a weak constitution, rather stupid, fond of music, and a certain arrangement in the top of the box to intermittently hold back a portion of the cards as they revolve.

Black-haired persons, on the contrary, are strong and healthy, but apt to be quarrelsome. If the hair is smooth and straight, it denotes constancy, but if curly, great ardor in the beginning of an attachment, followed by inconstancy, want of application and unfaithfulness. - New York Press.
